DR. BECKA MORGAN,

Welcome to the Khronos family. Our development team includes Brandon Linton, Maksim "Max" Stoyanov, and Victoria Rhine. Our developers are accomplished seniors in the Computer Science program at Western Oregon University (WOU).

During senior year at WOU, Computer Science majors are placed into teams and tasked with completing a capstone project. This project is a demonstration of the skills we have gained throughout our undergraduate education. Additionally, we apply principles of Disciplined Agile Delivery (DAD) in our approach to development solutions.

You will serve as our advisor throughout the capstone project. We will hold weekly meetings on Mondays at 1 PM to 2 PM. Meetings will correspond with a defined Scrum meeting or technical review and will serve as a time to grade milestones and sprint work. We ask that you provide us with technical assistance, management, and advising during these times. We recognize your time as valuable, therefore, our team commitment to you is regular attendance and steadfast preparedness.

Looking forward to our partnership,
THE TEAM AT KHRONOS
